

Innovation and heritage make an irresistible combination

Molins Tobacco Machinery and TMQS of Germany have formed a new partnership that will deliver real benefits to their existing clients and the mid-speed market.

The partnership was formed to link Molins' extensive global network and the innovative TMQS approach to the supply of quality spares and parts.

Molins performance kits (PK's) and TMQS quality technical improvement parts (QTIP's) will offer the industry an opportunity to improve on the OEM specification of their machines both in terms of quality and performance.

Additionally, in 2007 the new partnership will develop a cost-effective 8,000cpm Mk9/Max combination to provide a mid-speed maker that will deliver improved manufacturing flexibility and reliability.

The best just got better.
