

Pegasus 3000, Simply the best

It's hard to believe that automatic filter plug distribution was originally conceived by Molins Tobacco Machinery over 40 years ago. Today, as a result of continuous development and advancement, the Pegasus 3000 is the fastest machine for filter handling available on the market.

Its reputation for reliability and the ability to handle the most delicate of filter products has made it the first choice equipment for the high speed making machine lines throughout the world.

Molins dedication to this bench-mark machine has ensured that the Pegasus 3000 is even more commercially relevant to today's cigarette manufacturers.

Pegasus 3000 - Always evolving and always getting better.
