

MOLINS
Tobacco Machinery

The Classic Combination from Molins

The term 'Classic' has to be earned, it has to prove itself against others of its kind and be of lasting significance due to its purity of design, style and relevance.

Molins MK9 Classic Combination is the industry choice for reliable and robust cigarette manufacture throughout the world at 5,500cpm speed. This machine continues to be the benchmark by which others are measured and with new independent hopper drives, which can be tailored to your individual tobacco blends, and USB data collection, it is still the definitive machine in its class.

Molins MK9 Classic – Still setting the standards
