

OCTAVE

The classic with a new beat

Molins has created an innovative new making machine, the Octave.

Based on the solid foundations of the industry standard Classic Mk 9 the new machine is more efficient, faster and relevant to today's and tomorrow's cigarette production demands – a new beat.

From the independently driven hopper, completely new suction chamber and direct transfer system to the latest control system technology, the Octave has been rigorously designed for ease of use, reliability and robustness. No comparable machine produces more cigarettes per square metre, has the global support and technical back-up or the Molins heritage.

If you would like to hear how Molins have given a classic a new beat please contact your nearest sales office.
